Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 16, 17 and 18, the prior art of record neither anticipates nor suggests to a person of ordinary skill, at the time the invention was made, the claimed method, apparatus, article of manufacture for determining an annotation for a document, comprising the steps of obtaining an annotation proposed by a user to be associated with the document; automatically determining in accordance with a knowledge base containing allowed annotations, whether the user-proposed annotation matches one or more allowed annotations from the knowledge base; and annotating the document with an allowed annotation from the knowledge base when the user-proposed annotation matches the allowed annotation from the knowledge base; wherein the user need not consider any annotations when a single allowed annotation is automatically determined to match the user-proposed annotation, and when more than a single annotation is automatically determined to match the user-proposed annotation: (a) in a first mode, the user need only consider the matching allowed annotations and select one of the matching allowed annotations; and (b) in a second mode, the user need not consider any annotations but rather one of the allowed annotations is automatically selected.
